### 0.1 Reading

No formal assignment for this lab. Read up and make code generation work flawlessly. I enjoyed the recommendation for the extra chapters! I definitely prefer the *Crafting a Compiler* book.

### 0.2 Why Daniel Craig is a Bad James Bond

I had to google a picture of Daniel Craig to remind myself which Bond he was. While I'm no expert on the Bond movies or qualified to be a critic of any media, I agree that he was not the greatest Bond. To me, he seemed as if he was trying to be Batman or something. Quit brooding and get back to being a playboy Mister Bond!
